Radio Garden invites you to tune into thousands of live radio stations across the globe.

By bringing distant voices close, radio connects people and places. From its very beginning, radio signals have crossed borders. Radio makers and listeners have imagined both connecting with distant cultures, as well as re-connecting with people from 'home' from thousands of miles away.

Getting to know about the radio of a particular region helps in enormous ways as we can get to know about the population of that region, their culture, the dialects, the market interest of that region through radio.

If a person needs to establish market in a particular region this data would be of immense importance.

Also it gives the information about disaster or any serious situation and help in imparting required knowledge at the time of emergency.
